Blue Sky God: *the Evolution of Science & Christianity* *With Don MacGregor*

FRIDAY, 16TH - SATURDAY, 17TH MARCH

Based on his book of the same title which joins up current scientific views of reality with Christian theology, this course with Don MacGregor looks at some of the big questions around how we think about God and Jesus. Consider quantum consciousness, the power of the intentional mind, morphic resonance and other new scientific theories.

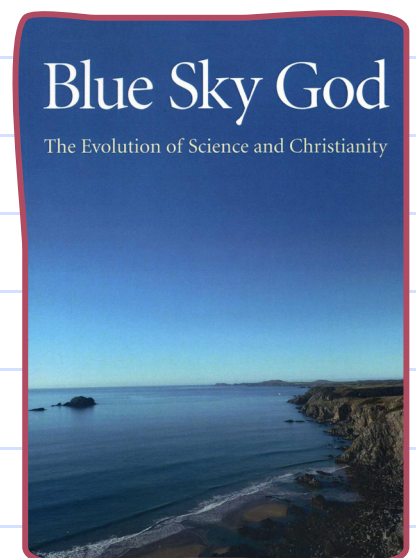

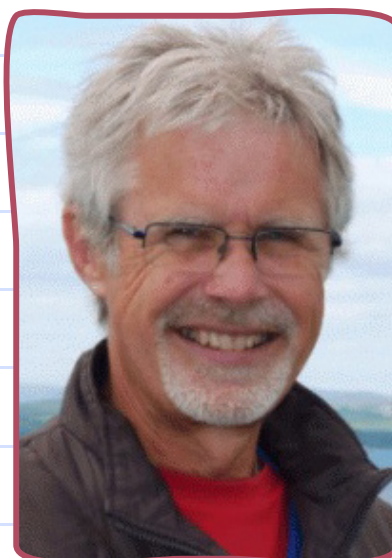

Don MacGregor is an Anglican Priest living in Fishguard, West Wales. He has an MA in Theology and has been a university chaplain, a science teacher and a youth worker. Don's Christian journey has moved from evangelical and charismatic to mystical and esoteric with aspects of contemporary holistic spirituality, and an emphasis on meditation and contemplative prayer. He is an active member of CANA (Christians Awakening to a New Awareness) and PCN (Progressive Christian Network).

Residential from £125,
non-residential £90.

Discount rates for clergy and
students apply.
